Java Back End / Front End Web Developer

Denodo is a Galician software company with international projection and offices in A Coruña (Spain), Madrid (Spain), London (UK), Munich (Germany), Palo Alto (CA, USA), Boise (ID, USA), Chicago (IL, USA), New York City (NY, USA), Chennai (India), Tokyo (Japan), Paris (France), Toronto (Canada) and Singapore.

Denodo Platform is our software product to deploy Enterprise Data Services through Data Virtualization and Cloud Data Integration technologies. It provides consuming applications with unified data views over distributed and heterogeneous data sources, including Relational Databases, Multidimensional Databases, NoSQL databases, SOAP and REST Web Services, Packaged Applications (e.g. SAP), etc.

We are looking for software engineers to join our Services Engineering team, to work as Java Developers in the area of websites development, in our offices in A Coruña (Spain).

You have the opportunity to join us and participate in innovative projects. You will be part of a team in charge of providing the best tools to share knowledge with our customers in the more effective way, and you will contribute analyzing, defining and developing solutions to improve corporate operations, always focused on the customers service.

We need people meeting the following requirements:
- BS or higher degree in Computer Science.
- Good verbal and written communication skills in English.
- Strong analytical and problem-solving abilities.
- Team worker with a positive attitude.
- Knowledge of the Java Platform.
- Knowledge of OO Design Patterns.
- Knowledge of SQL and relational database design.
- Knowledge of HTML/CSS and JavaScript/jQuery languages and frameworks.
- Java Web Applications and related technologies, esp. server-side

We value knowledge and/or experience in the following (these are not required):
- Software security techniques and technologies.
- Development Lifecycle and Version Control (pref. Maven and Git).
- Spring Framework, and/or related technologies.
- Thymeleaf template engine.
- Responsive and mobile design.
- Cross-browser development.
- Experience working with RESTFul Services and APIs.
- Testing and troubleshooting methodologies.
