Welcome to Trileuco Shell Offer!

* Documentation: https://trileucosolutions.com

```
ishiring@trileuco:~$ find . -iname *ComputerEngineer* -exec egrep -i "languages|technologie
s|methodologies|other" {} \;
```

I'm keen in many programming languages like Java or RubyOnRails. I have made a lot of persona
l projects with these and other technologies like node.js or MongoDB.
It is no difficult for me to learn other programming languages, and I'm continously learning
new things. Any good computer engineer should do it.
In other hand, I'm comfortable with agile methodologies like scrum and my current bedtime rea
ding is Clean Code. Good code needs efficient methodologies and good practices, and they are.

```
ishiring@trileuco:~$ cd are/you/interested?
