

JOB OFFER: DEVOPS ENGINEER

Denodo is a Galician software company with international projection and offices in A Coruña (Spain), Madrid (Spain), London (UK), Munich (Germany), Paris (France), Milan (Italy), Palo Alto (CA, USA), San Francisco (CA, USA), New York City (NY, USA), Chicago (IL, USA), Boise (ID, USA), Vienna (VA, USA), Singapore, Chennai (India), Sydney (Australia), Tokyo (Japan) and Beijing (China).

Denodo Platform is our software product to deploy Enterprise Data Services through Data Virtualization and Cloud Data Integration technologies. It provides consuming applications with unified data views over distributed and heterogeneous data sources, including Relational Databases, Multidimensional Databases, NoSQL databases, SOAP and REST Web Services, Packaged Applications (e.g. SAP), etc.

We are looking for DevOps engineers or technicians for our Technology team, to manage our development and testing environments, in our offices in A Coruña (Spain).

We need people meeting the following requirements:

- Good written communication skills in English.
- Team worker with a positive attitude.
- Experience administrating Linux and Windows Operating Systems (intermediate level). It includes operating system updates and management, and installation and configuration of services.
- Knowledge and/or experience managing Jenkins, SonarQube and Docker Server. It includes installation, configuration and maintenance.
- Knowledge and/or experience managing containers with Docker.

We value knowledge and/or experience in the following (these are not required):

- Managing Cloud platforms: AWS, Azure and Google Cloud.
- Docker Swarm or some other container orchestrator (Kubernetes).
- Programming with Python.
